

Introduction to Language Theory and Compilation Exercises

Session 6: First sets, Follow sets and LL(1) parsing

Reminders

$First^k$ sets construction algorithm

```

begin
  foreach  $a \in T$  do  $First^k(a) \leftarrow \{a\}$ 
  foreach  $A \in V$  do  $First^k(A) \leftarrow \emptyset$ 
  repeat
    foreach  $A \in V$  do
       $First^k(A) \leftarrow First^k(A) \cup \{x \in T^* \mid A \rightarrow Y_1 Y_2 \dots Y_n \wedge x \in First^k(Y_1) \oplus^k First^k(Y_2) \oplus^k \dots \oplus^k First^k(Y_n)\}$ 
  until stability

```

$Follow^k$ sets construction algorithm

```

begin
  foreach  $A \in V$  do  $Follow^k(A) \leftarrow \emptyset$  ;
  repeat
    if  $B \rightarrow \alpha A \beta \in P$  then
       $Follow^k(A) \leftarrow Follow^k(A) \cup \{First^k(\beta) \oplus^k Follow^k(B)\}$  ;
  until stability;

```

Action table construction algorithm

```

begin
   $M \leftarrow \times$  ;
  foreach  $A \rightarrow \alpha$  do
    foreach  $a \in First^1(\alpha)$  do
       $M[A, a] \leftarrow M[A, a] \cup \text{Produce}(A \rightarrow \alpha)$  ;
    if  $\epsilon \in First^1(\alpha)$  then
      foreach  $a \in Follow^1(A)$  do
         $M[A, a] \leftarrow M[A, a] \cup \text{Produce}(A \rightarrow \alpha)$  ;
  foreach  $a \in T$  do  $M[a, a] \leftarrow \text{Match}$  ;
   $M[\$, \epsilon] \leftarrow \text{Accept}$  ;

```

Exercises

Ex. 1. With regards to the grammar given by Figure 1:

1. Give the $First^1(A)$ and the $Follow^1(A)$ sets for each $A \in V$.
2. Give the $First^2(<\text{expression}>)$ and the $Follow^2(<\text{expression}>)$ sets.

Ex. 2. Which grammars in Figure 2 are LL(1)?

(1)	$\langle \text{program} \rangle$	\rightarrow	begin $\langle \text{statement list} \rangle$ end
(2)	$\langle \text{statement list} \rangle$	\rightarrow	$\langle \text{statement} \rangle \langle \text{statement tail} \rangle$
(3)	$\langle \text{statement tail} \rangle$	\rightarrow	$\langle \text{statement} \rangle \langle \text{statement tail} \rangle$
(4)	$\langle \text{statement tail} \rangle$	\rightarrow	ϵ
(5)	$\langle \text{statement} \rangle$	\rightarrow	ID := $\langle \text{expression} \rangle$;
(6)	$\langle \text{statement} \rangle$	\rightarrow	read ($\langle \text{id list} \rangle$) ;
(7)	$\langle \text{statement} \rangle$	\rightarrow	write ($\langle \text{expr list} \rangle$) ;
(8)	$\langle \text{id list} \rangle$	\rightarrow	ID $\langle \text{id tail} \rangle$
(9)	$\langle \text{id tail} \rangle$	\rightarrow	, ID $\langle \text{id tail} \rangle$
(10)	$\langle \text{id tail} \rangle$	\rightarrow	ϵ
(11)	$\langle \text{expr list} \rangle$	\rightarrow	$\langle \text{expression} \rangle \langle \text{expr tail} \rangle$
(12)	$\langle \text{expr tail} \rangle$	\rightarrow	, $\langle \text{expression} \rangle \langle \text{expr tail} \rangle$
(13)	$\langle \text{expr tail} \rangle$	\rightarrow	ϵ
(14)	$\langle \text{expression} \rangle$	\rightarrow	$\langle \text{primary} \rangle \langle \text{primary tail} \rangle$
(15)	$\langle \text{primary tail} \rangle$	\rightarrow	$\langle \text{add op} \rangle \langle \text{primary} \rangle \langle \text{primary tail} \rangle$
(16)	$\langle \text{primary tail} \rangle$	\rightarrow	ϵ
(17)	$\langle \text{primary} \rangle$	\rightarrow	($\langle \text{expression} \rangle$)
(18)	$\langle \text{primary} \rangle$	\rightarrow	ID
(19)	$\langle \text{primary} \rangle$	\rightarrow	INTLIT
(20)	$\langle \text{add op} \rangle$	\rightarrow	+
(21)	$\langle \text{add op} \rangle$	\rightarrow	-
(22)	$\langle \text{system goal} \rangle$	\rightarrow	$\langle \text{program} \rangle \$$

Figure 1: Grammar for exercises 1 and 4

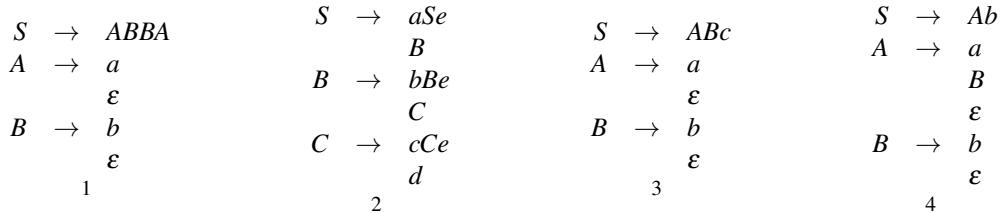

Figure 2: Grammars for exercise 2

Ex. 3. Give the action table for the following grammar:

(1)	$\langle S \rangle$	\rightarrow	$\langle \text{expr} \rangle \$$
(2)	$\langle \text{expr} \rangle$	\rightarrow	- $\langle \text{expr} \rangle$
(3)	$\langle \text{expr} \rangle$	\rightarrow	($\langle \text{expr} \rangle$)
(4)	$\langle \text{expr} \rangle$	\rightarrow	$\langle \text{var} \rangle \langle \text{expr-tail} \rangle$
(5)	$\langle \text{expr-tail} \rangle$	\rightarrow	- $\langle \text{expr} \rangle$
(6)	$\langle \text{expr-tail} \rangle$	\rightarrow	ϵ
(7)	$\langle \text{var} \rangle$	\rightarrow	ID $\langle \text{var-tail} \rangle$
(8)	$\langle \text{var-tail} \rangle$	\rightarrow	($\langle \text{expr} \rangle$)
(9)	$\langle \text{var-tail} \rangle$	\rightarrow	ϵ

Ex. 4. Program a recursive descent parser (in C, C++, ...) for rules (14) through (21) of the grammar given by Figure 1.
